#### **PART I**

### **THE IMPORTANCE OF EATING VEGETABLES**

Sliced Vegetables

- I** 1 Everybody knows that it is important to eat vegetables. The vitamins and minerals they contain are important for our health. It is especially important to eat them during childhood because they help children develop in a healthy way.
- II** 5 Scientists found that children who eat vegetables every day do better in school than children who do not. One reason may be that the vitamins and minerals in vegetables help children's brains develop well. Another reason may be that they have more energy to work harder in school. Still another 10 reason can be that children who eat vegetables get sick less often and do not miss school as often as children who do not eat vegetables.
- III** Scientists also found that children who eat vegetables every day continue to include vegetables in their diets, even when they are adults. And these adults who eat vegetables have better health and 15 more active brains. So, healthy eating habits that we learn in childhood stay with us and are important later in life, too.

**PART II**

### **A SPECIAL TOY FOR A NEW BABY**

Toy Octopus

**I**      1 When Jimmy Harrison was born, he was very small.

Only doctors and nurses took care of him. Even his mother could not hold him. He had to stay in the hospital for a long time, until he became strong enough to go home. He cried  
5 all the time and it was clear that he was lonely and unhappy.

- II** The situation improved after a nurse gave Jimmy a small, soft toy octopus. "Babies need to hold on to something. When a mother or father holds their baby, the baby often grabs their finger and holds on to it," explains  
10 Nancy, Jimmy's mother. "The arms of the toy octopus are just like fingers and our little baby became much calmer and stopped crying when he held this little toy. This helped him develop and get stronger more quickly. Jimmy was in the hospital for 76 days before we could take him home. He loves his little octopus toy and it is still by his side."
- III** Today, many hospitals give octopus toys to new babies. International organizations donate these  
15 toys to hospitals all over the world.
